Vladimir Lenin

It is the stage where the world is divided into two parts: the rich and the poor. It is the stage where the rich control the poor. It is the stage where the rich control the world. It is the stage where the rich control the future.

On Practice and Contradiction—Mao Tse-Tung 2017-11-14 The writings that underpinned the Chinese revolution, introduced by Slavoj Žižek These early philosophical writings underpinned the Chinese revolutions, and Mao's clarion call to insurrection has lost none of its ability to stir the blood and stimulate the mind. Drawing on a dizzying array of references from contemporary culture and politics, Slavoj Žižek's introduction reaches unsettling conclusions about the place of Mao's thought in the revolutionary canon.

democracy, and how revolutions are a mass empowerment against the forces of exploitative privilege. He also maps out the external and internal forces that destroyed communism, and the disastrous impact of the “free-market” victory on eastern Europe and the former Soviet Union. He affirms the relevance of taboo ideologies like Marxism, demonstrating the importance of class analysis in understanding political realities and dealing with the ongoing collision between ecology and global corporatism. Written with lucid and compelling style, this book goes beyond truncated modes of thought, inviting us to entertain iconoclastic views, and to ask why things are as they are. “A penetrating and persuasive writer with an astonishing array of documentation to implement his attacks.” —The Catholic Journalist

“By portraying the struggle between fascism and Communism in this century as a single conflict, and not a series of discrete encounters, between the insatiable need for new capital on the one hand and the survival of a system under siege on the other, Parenti defines fascism as the weapon of capitalism, not simply an extreme form of it. Fascism is not an aberration, he points out, but a ‘rational’ and integral component of the system.”—Stan Goff, author of Full Spectrum Disorder: The Military in the New American Century

Short Handbook of Communist Ideology—H. Fleischer 2012-12-06 We have once again decided to publish in our series a source-text for the study of Communist ideology. This synopsis of Principles of Marxism Leninism 1 (published at the end of 1959 and widely distributed in the Soviet Union) appears as a sequel to that of the Principles of Marxist Philosophy which 1 published in 1959 as The Dogmatic Principles of Soviet Philosophy. This book is a corporate work, done by some forty Soviet philosophers, sociologists, economists, Party-theoreticians and propagandaists, under the direction of O. V. Kuusinen (member of the Praesidium of the Communist Party of the Soviet Union). Except for a few clarifications, we have restricted ourselves to presenting the most important parts of the original text in an original translation which provides the material, in an authentic and handy form, for our Institute’s courses in Sovietology. In comparison to the other parts, the philosophical portions (Sections 1 and 2) have been held to a minimum since they repeat, for the most part, material which is already available in the synopsis of the Principles of Marxist Philosophy. I wish to thank the Rockefeller Foundation for their support which has made possible the research of our Institute as well as the preparation of the present work. J. M. BOCHENSKI 1 The original Russian title is: Osnovy marksizma-leninizma. Uebnoe posobie (Text book), Gosudarstvennoe izdatel’stvo politieeskoj literatury (State Publishing House for Political Literature), Moskva, 1959,774 pages, 300 000 copies.
