His moving account is a work of dedication."—New York Times Book Review "With commendable restraint, Stein uses newspapers, official documents, and the evidence of survivors to unfold a story made more harrowing by the unemotional simplicity of its narration."—Library Journal "Stein... suggests that the fire alerted the public to shocking working conditions all over the city and helped the unions organize the clothing industry, but his good taste keeps him from selling the reader any silver lining. A by-product of the careful research that has gone into this excellent narrative is an interesting sketch of the hard lives and times of working girls in the days when the business of America was business."—New Yorker March 25, 2011, marks the centennial of the Triangle Shirtwaist Factory fire, in which 146 garment workers lost their lives. It Takes a Village-Hillary Rodham Clinton 2012-12-11 Ten years ago one of America's most important public figures, First Lady Hillary Rodham Clinton, chronicled her quest both deeply personal and, in the truest sense, public to help make our society into the kind of village that enables children to become able, caring resilient adults. IT TAKES A VILLAGE is a textbook for caring, filled with truths that are worth a read, and a reread. In her substantial new introduction, Senator Clinton reflects on how our village has changed over the last decade, from the internet to education, and on how her own understanding of children has deepened as she has watched Chelsea grow up and take on challenges new to her generation, from a first job to living through a terrorist attack. She discusses how the work she is doing in the Senate is helping children and looks at where America has been successful, improvements in the foster care system and support for adoption, and where there is still work to be done, providing pre-school programmes and universal health care to all our children. This new edition elucidates how the choices we make about how we raise our children, and how we support families, will determine how all nations will face the challenges of this century.

Animal, Vegetable, Junk-Mark Bittman 2021-02-02 "Epic and engrossing." —The New York Times Book Review From the #1 New York Times bestselling author and pioneering journalist, an expansive look at how history has been shaped by humanity's appetite for food, farmland, and the money behind it all—and how a better future is within reach. The story of humankind is usually told as one of technological innovation and economic influence—of arrowheads and atomic bombs, settlers and stock markets. But behind it all, there is an even more fundamental driver: Food. In Animal, Vegetable, Junk, trusted food authority Mark Bittman offers a panoramic view of how the frenzy for food has driven human history to some of its most catastrophic moments, from slavery and colonialism to famine and genocide—and to our current moment, wherein Big Food exacerbates climate change, plunders our planet, and sickens its people. Even still, Bittman refuses to concede that the battle is lost, pointing to activists, workers, and governments around the world who are choosing well-being over corporate greed and gluttony, and fighting to free society from Big Food's grip. Sweeping, impassioned, and ultimately full of hope, Animal, Vegetable, Junk reveals not only how food has shaped our past, but also how we can transform it to reclaim our future.

The Sixth Extinction-Elizabeth Kolbert 2014-02-11 ONE OF THE NEW YORK TIMES BOOK REVIEW'S 10 BEST BOOKS OF THE YEAR A major book about the future of the world, blending intellectual and natural history and field reporting into a powerful account of the mass extinction unfolding before our eyes Over the last half a billion years, there have been five mass extinctions, when the diversity of life on earth suddenly and dramatically contracted. Scientists around the world are currently monitoring the sixth extinction, predicted to be the most devastating extinction event since the asteroid impact that wiped out the dinosaurs. This time around, the cataclysm is us. In The Sixth Extinction, two-time winner of the National Magazine Award and New Yorker writer Elizabeth Kolbert draws on the work of scores of researchers in half a dozen disciplines, accompanying many of them into the field: geologists who study deep ocean cores, botanists who follow the tree line as it climbs up the Andes, marine biologists who dive off the Great Barrier Reef. She introduces us to a dozen species, some already gone, others facing extinction, including the Panamanian golden frog, staghorn coral, the great auk, and the Sumatran rhino. Through these stories, Kolbert provides a moving account of the disappearances occurring all around us and traces the evolution of extinction as concept, from its first articulation by Georges Cuvier in revolutionary Paris up through the present day. The sixth extinction is likely to be mankind's most lasting legacy; as Kolbert observes, it compels us to rethink the fundamental question of what it means to be human.
